Automatic line for filled crêpes — 5 folds

BALPE, France • Category: Crêpe lines

The automatic line and the finished product — a nalysnyk folded into an envelope

Application

Fully automatic line for filled crêpes folded into an envelope shape (5 folds). An optimal solution for the industrial production of Ukrainian nalysnyky, stuffed crêpes and similar products with sweet or savoury fillings.

Finished product

Finished product size (example)	90 × 55 mm
Crêpe weight	about 45 g (50 g maximum)
Filling weight	from 20 to 25 g and above, depending on the filling type
Total product weight	from 65 to 80 g (agreed when ordering)

Output

Depends on the recipe and the product size.

Output	about 4800 pcs/h
Product of 70 g	about 336 kg/h
Product of 75 g	about 360 kg/h

Line composition

— automatic stainless steel machine cooking two crêpe bands;
— cast iron cooking cylinder Ø 1.60 m with electric or gas heating;
— option — a second cylinder (electric or gas) for cooking the crêpe on both sides;
— twin-head filling depositor (filling temperature up to 60 °C);
— first folding device;
— cutting device;
— final folding device;
— mixer and non-refrigerated 200 l batter vat.

Control

The line is driven by industrial controllers with a touch panel: parameters can be adjusted on the fly and recipes stored in memory. A built-in modem allows remote diagnostics and servicing from the BALPE factory in France.

Power supply and dimensions

Power supply	400 V, 3 phases + earth + neutral, 50 Hz
Compressed air	± 7 bar
Dimensions (cooking on one side)	10.40 × 2.18 × 2.75 m (+0.82 m with the cabinet open)
Dimensions (cooking on both sides)	11.65 × 2.20 × 2.75 m (+0.82 m with the cabinet open)
Batter vat	+0.80 m — placed in front of or beside the line

Standards compliance

The line is manufactured in accordance with EU standards.

Supply and service

Delivery, positioning at the customer’s production site, commissioning, staff training, warranty and post-warranty service, spare parts from stock in Kyiv.
